

WAYMARKER

High Performance 150/22 Sheet 69.1 Photoluminescent Escape Route Marking System

Waymarker Strip

Aluminum Waymarker Strips are ideal for wall installation. Self-adhesive for ease of installation. For directional indicators use **WAD Series**.

WSA-2 Aluminum Strip
39.5" long x 2" wide.

Polycarbonate Waymarker Strips for floor marking provide impact and chemical resistance with easy install self-adhesive backing, anti skid surface.

WSP-2 Polycarbonate Anti Skid Strip
39.5" long x 2" wide

Directional Indicators for Floor Application

Polycarbonate Directional Indicators, self-adhesive backing, anti skid surface.

WSD Directional Indicator
2" x 4"

Waymarker Tape

High Performance 150/22 or 250/30 self adhesive PVC tape provides a simple installation. Ideal for walls, door frames, handrails, equipment marking and door push bars/plates.

WNS-1 40' x 1" Roll 150/22 Tape
WNL-1 164' x 1" Roll 150/22 Tape
WNS-2 40' x 2" Roll 150/22 Tape
WNL-2 164' x 2" Roll 150/22 Tape

WTS-1 40' x 1" Roll 250/30 Tape
WTL-1 164' x 1" Roll 250/30 Tape
WTS-2 40' x 2" Roll 250/30 Tape
WTL-2 164' x 2" Roll 250/30 Tape

Door Marker Kit

Door Marker provides a self-adhesive 1" aluminum strip and preformed corners for ease of installation. A standard door frame requires 2 x Corners and 5 x Strips, for higher doors use additional strips as needed.

WDC-1 Aluminum Door Frame Corner
1" wide x 7.9" x 7.9" long

WDS-1 Aluminum Door Strip
39.5" long x 1" wide

Extruded Aluminum Waymarker System

Designed for low-location wall marking in applications that require an attractive quality finish. The extruded aluminum holder is mounted with concealed screws and can be removed when redecorating. A slight slant improves visibility from a normal viewing height and improves strip exposure to the charging source.

WAH-2 Aluminum Holder
118" long x 2.3" wide

Insert strips simply slide into the extrusion (3 x required for each holder). Finish with the push fit corner and end stops.

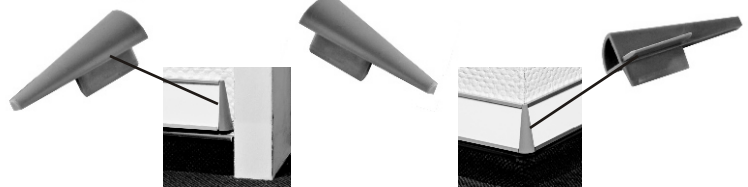

WAS-2 Insert Strips
39.5" long x 2.2" wide

WAR-2 Right End Stop

WAL-2 Left End Stop

WAC-2 Corner End Stop

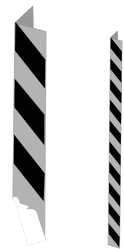

In dead end corridors, self-adhesive directional indicators can be placed along the Waymarker strip (recommended spacing 36").

WAD-L Directional Indicator-LEFT
WAD-R Directional Indicator-RIGHT

Warning Marker

Aluminum Warning Marker Identifies corners, edges and protrusions. Pre-drilled for screw mounting.

WAM-2 Aluminum Corner and Edge Marker
39.5" long x 2" x 2"

Step Marker

Step marker provides top and front marking for optimum visibility from both the top and bottom of stairs. Durable aluminum with self-adhesive backing enables easy installation while the 3M™ Safety-Walk™ finish provides superior wear resistance and anti-skid properties.

WSM Aluminum Step Marker
39.5" long x 2.4" wide (top)
x 1.2" high (front)

Exit Signs UL 924 Listed

The Lucenta series exit signs provide the ultimate in versatility and appearance with precision aluminum frame assembly and universal mounting bracket. Refer to data sheet No. 34.0 for further detail and options available on the Lucenta. Basic models are:

- LUC-R-1(-)**
Single face Red letters
- LUC-R-2(-)**
Double face Red letters
- LUC-G-1(-)**
Single face, Green letters
- LUC-G-2(-)**
Double face, Green letters

(Specify Frame Color for all signs)

The PMG series provide an economical solution for Exit Sign marking, fabricated from rigid PVC plastic, the sign is provided with 4 mounting holes and self-adhesive chevron indicators. Double sided signs are made up of two single face signs and are provided with 'L' shape clips for assembly by the installer.

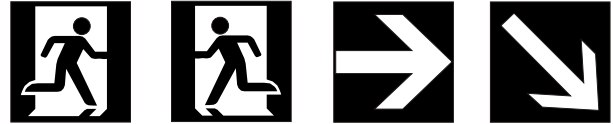

- PMG-R-1** Single face, 6" Red letters
- PMG-R-2** Double face kit, 6" Red letters
- PMN-R-1** Single face, 8" Red letters
(New York City requirement)
- PMN-R-2** Double face kit, 8" Red letters
(New York City requirement)

- PMG-G-1** Single face, 6" Green letters
- PMG-G-2** Double face kit, 6" Green letters

Waymarker Directional Indicators

New International Standard Running Person pictogram directional indicators. Just four graphics provide a multitude of directional signs. Simply select running person and an arrow for a direction. Self-Adhesive aluminum signs can be adhered or screw mounted.

General Safety Signs

To aid in the identification of emergency equipment or to provide specific instructions, Waymarker signs are supplied as self-adhesive PVC material or can be attached by hardware (supplied by others).

In addition to the standard signs shown below Evenlite can provide custom signs and maps as required.

WM503 Fire Alarm
Self-Adhesive PVC
8" x 12"

WM505 Fire Hose
Self-Adhesive PVC
8" x 12"

WM506 Fire Extinguisher
Self-Adhesive PVC
8" x 12"

WM501 Arrow Long
Self-adhesive PVC 4" x 12"

WM502 Not An Exit
Self-adhesive PVC 4" x 12"

WM504 Fire Extinguisher
Self-adhesive PVC 4" x 20"

Door Handle Markers

An integral part of waymarking is to identify the door handle so that precious time is not lost fumbling for the opening device. Handle markers are self-adhesive for ease of installation while wear-resistant polycarbonate ensures durability.

WHR Right Side Door Handle Marker
Polycarbonate Self-adhesive
4" x 10"

WHL Left Hand Door Handle Marker
Polycarbonate Self-adhesive
4" x 10"

For free swinging doors or push bar operation, use Waymarker Tape and/or Push Pull signs.

WHI Push marker
2" x 4"

WHP Pull marker
2" x 4"
