

RAZOR MK³

Good-Bye Never Looked So Good

Get the same remarkably thin, attractively modern Razor exit signage – now refined to deliver brighter illumination and easier installation.

Exceptional Brightness With Flawless Legend Uniformity

Evenlite uses an injection-molded 3mm light guide that produces a vibrantly illuminated legend of 18fL – 7 times the minimum code requirement for life safety at a 100-foot viewing distance. This unique refractive-pattern light guide distributes the LED light source evenly and flawlessly across the legend eliminating bright spots.

One-Piece Internal Assembly Enhances Versatility In The Field

Light guide, light engine, batteries and electrical connectors are neatly housed in a single assembly within the MK³ injection-molded frame. A unique flexible circuit board makes mounting a breeze in the field with a simple mating connector. Mounting knockouts work with standard junction boxes eliminating the need for custom boxes or extension rings.

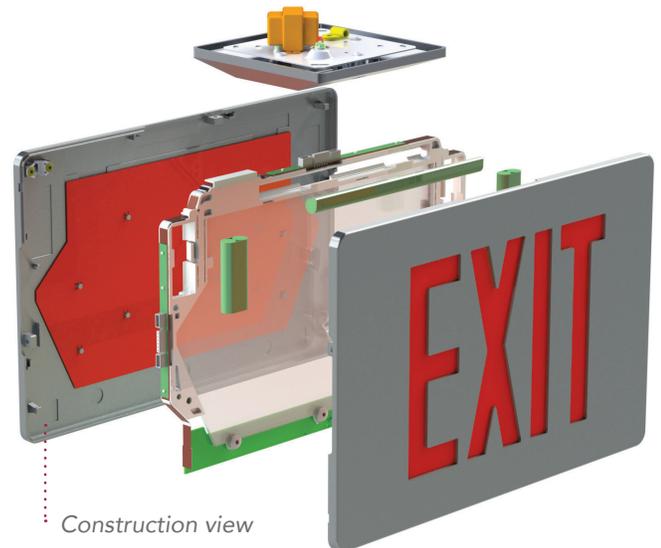

Sophisticated Electronics Provide Impressive Energy-Efficiency

High efficiency magnetic power supply requires just 2 watts for both single or double face signs. Versatile circuitry provides for many optional functions, including: self-test, self-diagnostics, fire alarm interface, flash in emergency mode, continuous flash in AC mode, and infrared remote testing. Premium high temperature, maintenance-free, eco-friendly Nickel Metal Hydride battery runs 2.6 times longer than the 90-minute code requirement.

Remote Capacity

Optional remote capacity batteries provide 2 watts additional power to run 1 or 2 watt Evenlite remote LED lampheads.

- >> 2 watts power consumption
- >> Snap-locking easy installation
- >> Maintenance-free, Nickel Metal Hydride battery provides up to 4 hours duration
- >> Remote Capacity
- >> Damp-location listed
- >> 5-year warranty

RAZOR MK³ Model Variations

Razor MK³ Classic

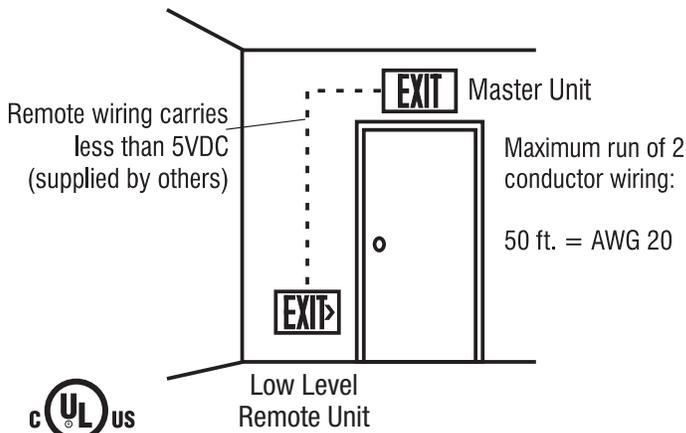

Evenlite's Razor MK³ Classic is a high quality, solidly constructed die cast aluminum LED exit sign with an ultra slim profile that never compromises performance. Sleek and modern, the Classic blends well wherever an inconspicuous fixture is preferred. The new Razor MK³ features field selectable top or end canopy mounting, snap-lock assembly and an optional square pendant rod with matching slim profile adaptors and canopy.

Razor MK³ Master - Remote

Combine all the features of the Razor MK³ Classic with the powerful ability to interface with another Razor via Remote, and voilà – you get the Razor MK³ Master - Remote. This is an ideal solution that allows the high-level Master Razor to power a low voltage low-level or remote exit sign.

Vandal-resistant, snap-lock cover suitable for floor proximity installation. (Remote Unit shown below)

Razor MK³ Classic with hang straight pendant and ceiling canopy

Razor MK³ Custom Graphics

Razor Classic components are integrated with open-face inserts to provide Razor MK³ Custom Graphics. These models feature bright uniform illumination both in stencil or background-illuminated custom graphics, allowing for many configurations. Phantom illumination is newly available where the legend is virtually invisible when the fixture is "OFF," illuminating only when AC or backup power is present. This option is ideal for signage with time-sensitive messages that require visibility only when the sign is "ON."

PHANTOM CUSTOM GRAPHICS

- Legend colors available in red, green, or blue, all with an opaque white background.
- White LED models allow for a multiple color option on the same fixture.
- Graphics and color choices are customizable providing you with many configurations.
